Beamtree Signs \$1m Singapore Coding Audit Contract

Beamtree Holdings Limited (“**Beamtree**” or “**the Company**” or “**the Group**”) (ASX: BMT), a leading provider of AI enabled decision support and data insights solutions for the healthcare sector leader is pleased to announce that the Company has been awarded a \$1m contract with the Ministry of Health (‘MoH’) of the Government of Singapore.

The contract win with the Ministry of Health of Singapore, is to provide a comprehensive clinical coding and documentation audit across 20 public and private hospitals in Singapore. This project will commence immediately and is scheduled for completion in Q3 FY26.

The award of the contract from a globally recognised leader in the healthcare sector is a recognition of the unique capabilities and strengths of Beamtree in the hospital clinical coding market.

The contract to essentially audit clinical data and documentation quality for MoH in a similar process to what BMT has done previously in Australia, Ireland, Saudi Arabia and Canada. The objective with these customers is to identify the level of data quality and management, so as to recommend software solutions, such as Beamtree’s Coding products, to improve and maintain customer health data quality.

Beamtree will leverage its key coding quality and benchmarking software to support delivery of the contract, including PICQ® (Performance Indicators for Coding Quality) and RISQ™ (Relative Indicators for Safety and Quality). These platforms will enable benchmarking, error categorisation, and targeted education recommendations, drawing on Beamtree’s extensive coding auditing and advisory experience in Australia, New Zealand, the Republic of Ireland, Canada, the UK and Saudi Arabia.

The contract includes standard terms and conditions for a clinical coding audit program including the usual rights of termination for non-performance. As well as contributing \$1m of revenue for the current financial year, the estimated working capital impact of the project at December 2025 is around \$0.5m given this project will be work in progress at that point pending milestone deliverables, which is when revenue will be payable.

Authorised for release by the Chair of the Board.

About Beamtree

A leading provider of AI decision support and data insights solutions, Beamtree supports healthcare providers globally. They believe in creating a better future for health by turning data into insights and action through automation. They help solve real-world problems in healthcare by developing smart tools that aim to improve patient outcomes. Their solutions and services offer customers an unrivalled range of analytics across four key product segments:

- **Diagnostic Technology:** Enabling the effective delivery of diagnostic services as they underpin the future of health and personalised medicine. Product: RippleDown
- **Clinical Decision Support:** Combining human and artificial expertise together to enhance decisions that improve care, value and experience. Product: Ansoff Deterioration Index
- **Coding Assistance and Data Quality:** Digitising and automating workflows with data, classification, coding & technical expertise to improve information standardisation, quality and timeliness. Products: PICQ, RISQ, Integrated Coding Platform.
- **Analytics and Knowledge Networks:** Combining data analytics solutions with peer-to-peer alliances that accelerate innovation and knowledge diffusion.
